Introduction

IES7110-2GS is a industrial grade, managed and redundancy Ethernet switch. It provided some kinds of advanced network managed function, like as: SW-Ring redundancy ring network, VLAN, Trunking, Quality of Service, Speed control, port mirroring, fault alarm and firmware upgrade online. SW-Ring can bring your Ethernet to intelligent redundancy. Standard Industry design, can satisfied every requirement of the industry scene. All components used industry grade, it takes products high reliability. It provided wide voltage power supply input.

SW-Ring^{TM} is designed as a rapid redundancy network arithmetic's. It provided recover technology for fault of rapid redundant network, the recovery time<20ms.
